Druk in je settings op pages

The image shows the GitHub repository settings interface. On the left is a dark sidebar with a list of settings categories. The 'Pages' category is highlighted with a red circle, and a red arrow points from it towards the main content area. The main content area has a dark background and is titled 'GitHub Pages'. Below the title, there is a description: 'GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.' Further down, under the 'Source' section, it states 'GitHub Pages is currently disabled. Select a source below to enable GitHub Pages for this repository. [Learn more.](#)'. There are two buttons: 'None' with a dropdown arrow and a 'Save' button. Below that is the 'Theme Chooser' section, which says 'Select a theme to publish your site with a Jekyll theme using the gh-pages branch. [Learn more.](#)' and features a 'Choose a theme' button.
